

# Stebbins Cold Canyon Mushroom List

List of mushrooms found by Bob and Barbara Sommer at the Stebbins Reserve 1985-2002. Time sampling was not systematic and there were major gaps between visits. Some of the species names have changed since the list was started; e.g. many *Hygrocybes* are now *Hypholoma*. Number found of a species is indicated by asterisks:

\*\*\* abundant (> 30 specimens)  
 \*\* many specimens (10-29)  
 \* few specimens (>10)

In a few cases, records of time found and number found are missing.

	Nov/Dec	January	February	March/April	May/June
<i>Agaricus campestris</i>	*	*		*	
<i>Agaricus hondensis</i>	*				
<i>Agaricus semotus</i>	*				
<i>Agaricus silvicola</i>		*			
<i>Agaricus xanthodermus</i>					*
<i>Agrocybe pediades</i>		*			
<i>Agrocybe praecox</i>			*		
<i>Aleuria aurantiaca</i>		*			
<i>Aleuria</i> sp.					
<i>Amanita calyptata</i>	**	*	*		
<i>Amanita gemmata</i>	*				
<i>Amanita inversa</i>			*		
<i>Amanita ocreata</i>	*			*	
<i>Amanita pachycolea</i>	*	*	*		
<i>Amanita phalloides</i>	*				
<i>Amanita velosa</i>				***	
<i>Armillaria mellea</i>	*				
<i>Armillaria ponderosa</i>		*			
<i>Anthracobia melaloma</i>				***	
<i>Armillaria ponderosa</i>		*			
<i>Astraeus hygrometricus</i>			*		
<i>Bolbitius vitellinus</i>	*	*	*	*
